

Biodiversity Monitoring in Australia

Eds. David Lindenmayer
and Philip Gibbons

Publisher: CSIRO Publishing

- The book arose from a major workshop at ANU last year.
- Looks at the many aspects and problems associated with biodiversity monitoring.
- Focussed on what is shown to have worked.
- Approximately 40 contributors

Raven Biology of Plants

Ray F. Evert and Susan E. Eichhorn
Publisher: W.H. Freeman and Company

- Latest (8th) International Edition of Raven Biology of Plants, completely revised.
- Beautifully presented.
- Best taken in frequent small bites.

Australian Carnivorous Plants

Greg Bourke and Richard Nunn
Publisher: Redfern Natural History
Productions

- A delicious book of some of Australia's most fascinating and beautiful plants.
- All the important facts about each family.
- But mostly beautiful photos.
- Some photos of habitat and some photographic info.
