ABORIGINAL PLANT USE TRAIL

Aboriginal cultures of Australia trace back to the oldest living cultural history in the world.
Aboriginal people's knowledge of plant use, such as an ability to identify and locate edible and useful plants, has been critical to their survival.

The trail at the Gardens is one way that this knowledge can be shared and appreciated.

The Aboriginal Plant Use Trail highlights a selection of plants and some of the ways that these were used by Aboriginal people in different parts of Australia. Similar plants may have been used for the same purposes in other areas, depending on local availability.

Look at the different plants along the trail and see if you can tell which parts were eaten or used medicinally, or which could have been used for fibre.

Many of the food-producing plants bear their fruits for short periods of the year only. Thus the part of the plant that is used will not always be present.

Information for the Aboriginal Plant Use trail was obtained from published sources.

PLEASE DO NOT PICK OR EAT THE PLANTS

- Citrus australisica Finger lime
- Banksia species Banksia
- Santalum acuminatum Quandong
- 4 Livistona australis Cabbage Tree Palm
- 5 Xanthorrhoea species Grass Tree
- 6 Dianella species Flax Lily
- Lomandra longifolia Spiny-headed Mat Rush
- 8 Brachychiton rupestris Bottle Tree
- 9 Casuarina and Allocasuarina species She-oak
- 10 Acacia aneura Mulga
- 11 Doryanthes excelsa Gymea Lily
- Podocarpus elatus Plum Pine
- 13 Eustrephus latifolius Wombat Berry
- Callitris species Native Cypress Pine
- 15 Macrozamia spp. Burrawang
- 16 Dodonaea viscosa Sticky Hop Bush
- Persoonia pinifolia Geebung
- Backhousia citriodora Lemon Myrtle
- 19 Rubus moluccanus Native Raspberry
- 20 Hibiscus heterophyllus Native Hibiscus
- 21 Indigofera australis Austral Indigo
- 22 Syzygium australe Lilly Pilly
- Araucaria bidwillii Bunya Pine
- 24 Acacia melanoxylon Blackwood
- 25 Tasmannia insipida Pepper Tree
- 26 Hedycarya angustifolia Austral Mulberry
- Dicksonia antarctica Soft Tree Fern
