

# Stink bug blitz

3-11 October 2020

Brown marmorated stink bug (*Halyomorpha halys*, BMSB) is a mottled brown coloured, shield shaped stink bug. It is a voracious feeder, affecting about 300 known plants including nuts, fruit, vegetables and ornamentals.

Susan Ellis, Bugwood.org

## How to participate

**Download** the free MyPestGuide™ Reporter app

Between 3 -11 October look for and secure any suspected BMSB in your backyard or local botanic gardens

Report what you find using the app

## How to make a report

1. Secure the stink bug then take a photo
2. Turn on location
3. Select 'Botanic gardens' in the 'Send report to' field (click 'Show More' if it is not visible)
4. Report the where you looked for BMSB in the 'Where' field
5. Report presence or absence of signs of BMSB in the 'I found' field
6. Press 'Continue' to submit your report
7. Keep any specimens
