

Tree of heaven blitz

14-20 November 2020

Tree of heaven (*Ailanthus altissima*) is an introduced species which has been shown to be a host of spotted lanternfly and brown marmorated stink bug. Help us identify where this potential host plant can be found.

How to participate

Download the free MyPestGuide™ Reporter app

Between 7-15 November 2020 look for tree of heaven in your backyard or local botanic gardens

Report what you find using the app

How to make a report

1. Take a photo of the suspected tree of heaven, be sure to photograph leaves, fruit, flowers and bark
2. Turn on location
3. Select 'Botanic gardens' in the 'Send report to' field (click 'Show More' if it is not visible)
4. Report where you looked for tree of heaven in the 'Where' field
5. Report the presence of tree of heaven & a plant description in the 'I found' field
6. Press 'Continue' to submit your report
