Will you help the Friends to
help the Gardens?

The Public Fund of the Friends of the Australian National Botanic Gardens

Over the years the Friends have contributed almost \$1,000,000 to our beautiful Botanic Gardens. Included in this amount is \$150,000 raised through donations to the Public Fund. The Public Fund supports projects that range across the Gardens' scientific, education, conservation and recreational responsibilities. The Friends would love to receive more than \$50,000 in donations so that more can be done to help the Gardens. Donations over \$2 to the Public Fund are tax deductible.

Bringing Visitors to the Gardens

Very soon you will see a dramatic treehouse amongst the melaleuca trees in the lower reaches of the Gardens - a place for early morning birdwatching, for quiet reflection, for kids to climb, explore and learn.

Built mainly of timber, the treehouse will include some sourced from fallen Gardens trees.

Cave Urban, a unique international design collective of architects, artists and designer/makers based in Sydney, was chosen in May 2017 to design and build the treehouse for this special site. Construction will begin in the latter part of 2017, with completion near the end of the year. The exciting design is based on principles of sustainable timber use, recycling, and ancient techniques of timber preservation such as charring.

This project is the result of a partnership involving the Gardens, the Friends and the Public Fund, and is the largest contribution so far of the Friends to the Botanic Gardens.

Please help Australia's living national collection - donate to the Public Fund of the Friends today

Supporting Science at the Gardens

Current Public Fund projects include the funding of an expedition to north Queensland to collect climate change-threatened high-altitude rainforest species. This project will assist in their long-term conservation and 'spread the risk' by securing genetic material in additional ex-situ holdings at the ANBG.

Another project involves digitising lichen-type specimens at the Centre for Australian National Biodiversity Research. This will create access to previously-hidden collections, and links to the Friends' sponsored lichen website [www.anbg.gov.au/lichen] will publicise their environmental and educational importance.
